ÉTINCELLES

Biographical Sketch—Moritz Moszkowski

Born, Breslau, Germany, Aug. 23, 1854

Died, Paris, France, March 9, 1925

MORITZ MOSZKOWSKI'S father, a Polish gentleman of independent means, early recognized his son's musical talent. Moritz received piano lessons at home and then was sent to the Dresden Conservatory and later to the Conservatories of Stern and Kullak in Berlin. At 19 he gave his first piano recital in Berlin. His success was immediate and encouraged him to tour Europe. He soon became widely known as a brilliant concert pianist. He also won distinction as conductor of his own compositions. Throughout his career he devoted much of his time to composition. He was also a very successful piano teacher. He made Berlin his home until his forty-third year. He then established himself in Paris, staying there until his death.

Moszkowski's most famous compositions are his *Spanish Dances* originally written for the piano four hands and ultimately transcribed for piano solo and for symphony orchestra. His piano compositions are all very pianistic and brilliant. The *Valse brillante in A-flat*, *En Automne*, *Guitarre*, *Valse in E*, *Serenata*, *Caprice Espagnol*, and this composition are his best known pieces.

Form and Structure: This composition is in Composite Song-Form. The key is B-flat major.

Part One consists of two sixteen-measure periods. The first is in B-flat major but ends on the dominant of D minor (meas. 1-16). The second is in F-major (meas. 17-32). Part Two contains two distinctive sixteen-measure periods with repetitions and extensions. The first period is in B-flat minor but ends on the dominant of D-flat major (meas. 33-48). This theme is repeated in G-flat major but in the last two measures slips into F-major (meas. 49-64). The second period is in B-flat major for the first eight measures and in E-flat major the last eight measures (meas. 65-80). It is then extended by means of a series of sequences forty-eight measures more ending on the dominant of B-flat major (meas. 81-128). Part One and Part Two are to be repeated. Part Three repeats the first sixteen-measure period of Part One (meas. 129-144). The first four measures of the next period are stated twice (meas. 145-152). A sequential development then follows which leads into the Coda (meas. 153-168). The brilliant Coda is forty-five measures long and brings the piece to a very effective conclusion (meas. 169-213).

Interpretation: "Étincelles" is a French word meaning "sparks." The suggestion, in the first eight measures, of flying sparks and the sudden flaring up of the flame is particularly vivid. The effect of this composition is largely dependent upon the achievement of a delicately, crisp staccato. All staccato parts should be played with the whole arm. The wrist should be relaxed, the fingers well rounded. The vibrating motion of the whole arm will serve to impel the fingers toward the keys and away from them. The accents at the last beat in meas. 21-24 may be secured by a drop of the wrist. The careful observance of the *poco ritardando* indicated at meas. 47, 63, 72, and 80, will prevent a too mechanical rendition of these sections. The theme beginning at meas. 65 should be started a bit slower than *a tempo* and then worked up to speed. This will heighten the

*giocos*o effect. A *quasi* music-box effect should be striven for in meas. 169-176. The echo effect in the measures following should be clearly realized. The running passages beginning at meas. 185 may be likened to dancing flames. They should go very smoothly with just a touch of brilliancy at the end. The final section in double thirds (meas. 201-209) should be played with the utmost lightness. The last dying sparks (meas. 210-213) with the most delicate touch possible. It is imperative that the pedal releases be made precisely as indicated. The exact observance of the pedaling indicated will insure a crisp and sparkling rendition of this charming composition. (In order to prevent a possible misunderstanding of the D. S. at meas. 129, the playing order of this composition follows: Meas. 1-32; repeat meas. 1-32; meas. 33-129; repeat meas. 2-129; meas. 130-213.)

Glossary

<i>Moszkowski</i>	pronounced	Mōsh-kōf'-skī

Recitation Questions

1. What nationality was Moczowski?
Ans.
2. Name his most famous compositions.
Ans.
3. What particular technical problem does this piece present?
Ans.
4. What does the first theme suggest?
Ans.
5. Explain the meaning of *D. S. senza ripetizione*.
Ans.
6. How should the staccato parts be played?
Ans.
7. What is the meaning of *Etincelles*?
Ans.
8. How may a mechanical rendition of the middle part be avoided?
Ans.
9. What is the principal function of the pedal in this piece?
Ans.

Music Education

vs.

Imitation of the Teacher

Music Education is no longer a luxury. It has become a part of our everyday life, and is of vital importance to every cultured person. But, there is a vast difference between a Music *Education* and the ability to move the fingers over the keyboard to produce a succession of sounds. In one case, there is initiative and musical understanding—the other is mechanical mimicry of the teacher.

A Music Education for a piano student consists of two things:

- (1) A mind trained to understand the fundamentals and construction of music, and the principles which underlie piano playing.
- (2) Hands trained to execute the will of the educated mind.

Equipped with a true Music Education, the student is materially assisted in his own playing—he can draw on his store of accumulated knowledge and make independent progress—he can understand and appreciate the artistry of others.

Lacking a Music Education, the student can only mimic the teacher—there is no musical inspiration—he has no foundation of music knowledge upon which he can build and progress.

This Composition offers the student not only the music score with authoritative pedaling, fingering and phrasing—but also the poetic idea of the composer in writing this particular number, and annotations on proper interpretation. The entire Progressive Series Course is just as complete, just as sound pedagogically and musically as this composition.

Talent in music is not essential to the acquirement of a practical education in music. The *Progressive Series of Piano Lessons* enables the music instructor to impart a Music Education with the same success and results with which academic subjects are taught in the public schools.
